#### **DETAILED ACTION**

### **Priority**

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

#### Information Disclosure Statement

2. The Information Disclosure Statement (IDS) received on October 9, 2003 has been considered by the Examiner and he initialed copy (one copy) of the IDS is attached with this correspondence.

# **Drawings**

3. The drawings are objected to because elements 19 in figure 2, element 22 in figure 3, elements 29,26,27 and 28 in figure 4 should be properly labeled. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the

remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### Specification

4. The abstract of the disclosure is objected to because reference made to figure 4, see at the end of the abstract (Fig.4), should be deleted. Correction is required. See MPEP § 608.01(b).

## Claim Objections

5. Claims 5/4, 6/5,6/4,7/4,7/5, 7/6----23/22 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

# Claim Rejections - 35 USC § 101

6. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-23 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claimed invention is not limited to a practical

application. Viewed as a whole, the claimed invention is merely driving a new input (a1, ---sn) using an analog feedback shift register from the external first and second generated sequences. It does not impart any function to the synchronization of the received signal.

# Conclusion

- 7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US publication Number US 2005/0254558 and US patent number 4,114,155 to Charles Dutcka and Raab respectively disclose synchronizing a received Gold sequences using feedback shift register.
